# TAO Translator v1.3.2 [1]

Submitted by Oleksii Serdiuk [2] on Tue, 26/07/2016 - 18:45

TAO Translator [3]

## Related projects:

After seven months since last release, a new version of TAO Translator was released this weekend. Today it was approved in all relevant app stores, so feel free to go and update.

As with previous release, this release contains only one fix: yet another workaround for “server replied: Forbidden” error with Google Translate service. Unfortunately, this workaround might stop working any moment, as it was with previous ones. If you’d like to know more why this issue occurs, you can read my explanation on GitHub [4].

And, as always, technical changes between versions 1.3.1 and 1.3.2 [5] can be seen on GitHub.
