We only collect anonymous information

We use technologies like cookies (small files stored by your browser), web beacons, or unique device identifiers to anonymously identify your computer or device so we can deliver a better experience. Our systems also log information like your browser, operating system and IP address.

We do not collect personally identifiable information about you. In other words, we do not collect information such as your name, address, phone number or email address.

We do not store or share your precise location

We do not use or collect your precise geographic location.

We don’t share your personal data with other companies

We generally do not share personally identifiable information (such as name, address, email or phone) with other companies.

Ad companies collect anonymous data

Ad companies may use and collect anonymous data about your interests to customize content and advertising here and in other sites and applications. Interest and location data may be linked to your device, but is not linked to your identity.

Google Ads

Google operates the Google Display Network (comprising partner websites and some Google properties like YouTube), DoubleClick online ad serving products and the DoubleClick Ad Exchange, and Invite Media. These provide advertisers with the tools needed to plan, execute and analyze marketing programs with greater ease and efficiency, while enabling publishers to maximize their returns from online advertising.

The Google Display Network helps generate awareness by getting ads in front of consumers, so they can learn about the business as they consider their options.

DoubleClick for Publishers (DFP) is a comprehensive hosted ad serving platform that streamlines ad management functions and allows generating even-greater advertising margins.

Google Analytics

Google Analytics is a web analysis service provided by Google Inc. (“Google”). Google utilizes the Data collected to track and examine the use of this Application, to prepare reports on its activities and share them with other Google services.

Google may use the Data collected to contextualize and personalize the ads of its own advertising network.

This integration of Google Analytics anonymizes your IP address. It works by shortening Users’ IP addresses within Member States of the European Union or in other Contracting States to the Agreement on the European Economic Area. Only in exceptional cases will the complete IP address be sent to a Google server and shortened within the USA.
