This weekend a new version of Fahrplan was released. Unfortunately, due to one critical issue, BlackBerry 10 release was postponed. Today the issue was fixed and I submitted Fahrplan v2.0.25 to the BlackBerry World. The update should appear in few days.

ChangeLog:

- Display parser short name on main page.
- Icon refresh: now it's square, like most BlackBerry 10 icons.
- New: Slovenian translation.
- Fix: Rendering of details page could get borken (occured with MVV, but possible with all backends).
- Fix: Text not fully visible on 720x720 resolution devices. Also, all context menu items should be displayed now without need to scroll.

As usual, you can check changes between versions 2.0.24 and 2.0.25[4] on GitHub.
