TAO Translator [3]

Related projects:

A new version of TAO Transator was released just before the Christmas. Today it was approved in all relevant app stores. The only purpose of this release is to fix “server replied: Forbidden” error in Google Translate service. However it also includes two new languages, which were submitted after v1.3.0 release [4]: Hungrian and Portuguese.

There were few other, more technical changes. You cansee them on GitHub [5].
