## Description:

**TAO Translator** (formerly, **The Advanced Online Translator**) uses online translation services to provide translations.

Currently supported services:

- **Google Translate** — supports translation, transliteration for most non-latin scripts, language detection, and dictionary with reverse translations for single words.
- **Microsoft Translator** (a.k.a. **Bing Translator**) — supports translation and language detection.
- **Yandex.Translate** — supports translation and language detection.
- **Yandex.Dictionaries** — supports dictionary with transcription for some languages, synonyms, and reverse translations.

More services might be added in future.
