Fahrplan ^[1]

A journey planner and timetable application

Short description:

<http://fahrplan.smurfy.de/>

Homepage:

Supported platforms:

- Nokia N9
- Symbian
- BlackBerry 10
- Ubuntu Touch
- Sailfish OS

UI Languages:

- English
- Deutsch
- Українська
- Русский
- Nederlands
- Ελληνικά
- Svenska
- Slovenščina
- فارسی
- Română
- Polski

Technologies:

- C++
- Qt 4
- Qt 5
- QML

Description:

A journey planner and timetable application for a lot of train and public transport lines in Europe, USA and Australia.

Features:

- Plan a journey from one station/stop to another (with one via station if supported by provider).
- Select type of transportation (depends on provider).
- Real-time timetable information for a station/stop (with direction if supported by provider).
- Find a nearby station based on your GPS location (if supported by provider).
- Add station to favorites for quick access in future.
- Add journey to calendar.

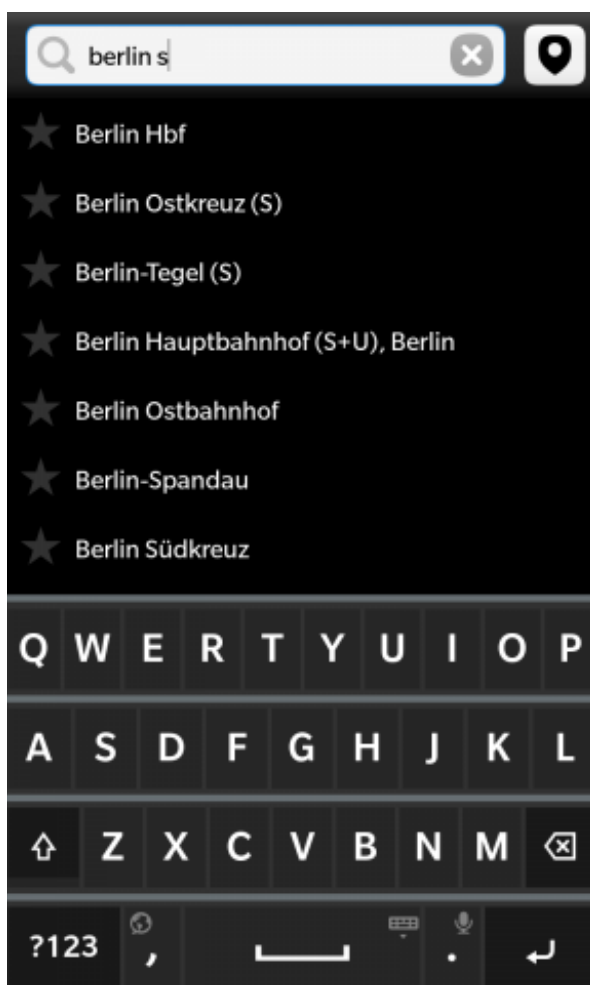

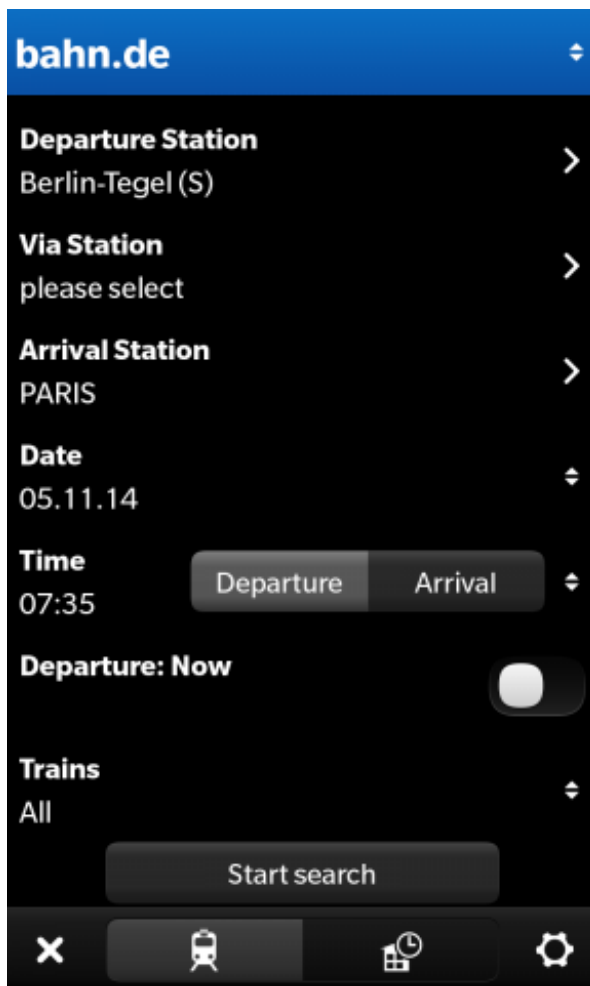

Supported providers:

- **Germany and Europe (bahn.de)** - supports via station and GPS location.
- **Germany, Munich (MVG)** - supports via station and GPS location.
- **Austria (oebb.at)** - supports via station and GPS location.
- **Austria, Salzburg (SVV)** - supports via station and GPS location.
- **Denmark (rejseplanen.dk)** - supports via station and GPS location.
- **Switzerland (sbb.ch)** - support via station, timetable with direction and GPS location.
- **Norway (reiseinfo.no / nri)** - supports GPS location.
- **Netherlands / Belgium (9292ov.nl)** - supports via station and GPS location.
- **Sweden (vasttrafik.se)** - supports via station and GPS location.
- **Sweden (ResRobot)** - supports GPS location.
- **Australia, Victoria (ptv.vic.gov.au)** - supports via station.
- **Australia, Sydney (transportnsw.info)** - supports via station.
- **USA, SF Bay (511.org)** - supports via station.
- **Dubai (rta.ae)** - supports via station.

My contribution:

One of the project maintainers. Active participation in the project development and improvement, Symbian port, BlackBerry 10 port, bugfixes.
