This weekend a new version of Fahrplan was released. Unfortunately, due to one critical issue, BlackBerry 10 release was postponed. Today the issue was fixed and I submitted Fahrplan v2.0.25 to the BlackBerry World. The update should appear in few days.

ChangeLog:

- Display parser short name on main page.
- Icon refresh: now it's square, like most BlackBerry 10 icons.
- New: Slovenian translation.
- Fix: Rendering of details page could get borken (occured with MVV, but possible with all backends).
- Fix: Text not fully visible on 720x720 resolution devices. Also, all context menu items should be displayed now without need to scroll.

As usual, you can check [changes between versions 2.0.24 and 2.0.25](#)^[4] on GitHub.
